HELEN ANDERSON

Helen is a Business Intelligence Consultant focused on leading projects that use AWS services to empower users and improve efficiencies.

She has been recognised as an **AWS Expert** for her work on both the technical side of projects, and onboarding and educating users through blog posts, workshops and training.

She is a passionate advocate for Data Analysts and Women in Tech and is well known in the Data Community for writing **beginner friendly blog posts**, teaching and mentoring those who are new to the tech industry.

LIFTING OTHERS UP

Helen contributes to the Tech community through her blog posts and Twitter where she not only shares her own posts, but lifts others up by sharing posts from the community.

As a Woman in Tech and career switcher, Helen is passionate about mentoring and inspiring those who are underrepresented in the industry.

She runs technical training for junior Data Analysts who can benefit from her experience in making the move to a more technical role.

EXPERTISE WITH AWS

Helen's most recent project was leading and project managing a successful **SQL Server to AWS Aurora migration** giving 60+ Data Analysts a greater level of empowerment, increasing the performance of the environment and retiring inefficient processes to reduce overall platform and disc costs.

She spoke at the **New Zealand Data Science and Analytics forum** and gave insight into the project, describing the challenges and successes that comes from migrating from traditional database technology to The Cloud.

She contributes and moderates on Dev.to sharing best practice and tutorials on AWS, SQL and Big Data topics. Her post "AWS from A to Z" is the **most popular AWS post ever on Dev.to**, with her AWS series reaching over **60k views** and SQL series topping **138k views** on Dev.to alone.

These popular posts are the basis for her **first three books**, in progress on LeanPub.

Learn AWS by Doing

WHAT OTHERS ARE SAYING

"The topic of moving from SQL Server to Aurora is fairly popular in enterprise circles. However, there are very few articles about how this migration actually plays out in the real-world. Luckily, this post does exactly that and is a fantastic read."

- **Kyle Galbraith, Founder - AWS: Learn by Doing**

"Writing... has shown me just how difficult it can be to write these things in a clear, simple fashion and Helen is an expert in doing just that."

- **Alan Hylands, Founder - Simple Analytical**

"I just came back to this post by @helenanders26 for some SQL tips and was marveling at the quality of this information. I'm biased to love DEV content, but seriously WOW."

- **Ben Halpern, CEO and Founder - Dev.to**
